

- We design, build, and deploy production-grade **Artificial Intelligence systems** for financial services, insurance, and telecoms.
- **From strategy to deployment**, our AI consulting work turns AI vision into measurable results.

WHAT SETS US APART

- ❖ **AI-First, Outcome-Focused** - Built-for-deployment solutions — not research experiments
- ❖ **Explainability Built-In** - Easy-to-use, transparent, auditable, regulator-ready AI
- ❖ **Sector Experience** - 40+ Years in finance, insurance, telecom, energy, healthcare & IT
- ❖ **Flexible Delivery** - Advisory, build, or embedded teams

WHAT WE DELIVER

- ✓ End-to-End AI with Agentic AI and Generative AI
- ✓ Explainable AI (XAI) with AI Ops/ML Ops
- ✓ Simulation & Predictive Modelling
- ✓ Document Intelligence & LLM Automations
- ✓ Network & Workflow Optimization

SELECTED USE CASES

- AI-driven fraud detection with high accuracy
- Explainable LLM models for underwriting and credit scoring
- Forecasting tools for claims volumes and infrastructure loads
- Dashboards to translate AI outputs into regulator-ready insights
- Simulation engines for optimizing service operations and flows

TEAM HIGHLIGHTS

- **Cengiz Hasan, PhD** - AI Engineering & Systems Optimization (*StevensTech/USAirforce project, Huawei*)
- **Huseyin Demirci, PhD** - Quantitative Analytics & Cybersecurity (*Huawei, Tübitak*)
- **Yusuf Arslan, PhD** - Explainable AI for Regulated Environments (*BNP Paribas, TEIAS Energy, Tübitak*)

Backed by specialists in project delivery, integration, and regulatory alignment.
